FINAL SITE MASTER PLAN OPTIONS

SELECTED OPTION

PERMITTING OBJECTIVE: Consider a development plan which avoided impacts to Tributary 1 but impacted the totality of Tributary 2.

RESULTANT DESIGN: This option resulted in the construction of all needed production facilities in their most efficient and compliant configuration including an expansion of our Finished Production area requested of the design team during the final stages of master planning. This option ensures the highest level of FDA compliance for material movement, segregation of waste and product streams, and transportation of raw materials, intermediates, and aseptic products. This option meets all Novo Nordisk requirements and is the preferred option.
